

Airless Spray Painting Equipments

Airless Sprayers specially design for Enamel paint & primers, Epoxy paint & primers, Polyurethane coating Low viscous coatings and lacquers.

Specially Designed for Putty Spraying.

Compact and maintenance free hydraulic part.

Positive displacement piston pump provides uniform & easily controlled finishing.

Typical fluid handled

Interior exterior latex, Emulation, Enamel, Primers, Oil based, Urethanes, Water proofing material, High & Low viscous epoxies, Putty.

Applications

- » Buliding Interior & Exterior painting
- » Bridges and roofs Coatings
- » Corrosion preventive coatings
- » Decoretive Coating

Technical Specification

Model :- C641

Ratio :- 64:1

Fluid Output Per Minute(lpm) :- 11 lpm

Air Inlet Pressure Max.(Kg/cm²) :- 6 (Kg/cm²)

Output Pressure Max (Kg/cm²) :- 384 (Kg/cm²)

Accessories

Airless Spray Gun

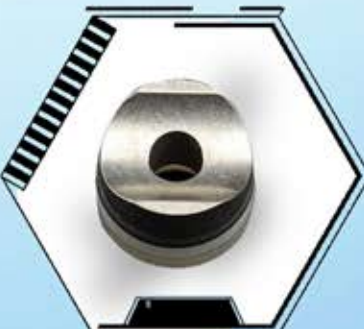

Airless Spray Gun HD

Nozzle Holder

Reversible Tip

Steel Guard

Filter Cartridge

High Pressure
Paint Hose

Stirrer / Agitator
